

Primary four

Revision sheet

Choose the correct answer:

1-The.....is an example of unicellular living organisms.

a-frog b-snake **c-yeast fungus** d-bean plant

2-yeast fungus is used in making.....

a-oil **b-bread** c-salt d-sugar

3-.....is a fluid that fills the cell

a-Green plastids **b-Cytoplasm** c-Nucleus d-Cell wall

4-.....organizes the biological operations in the cell

a-Nucleus b-Cytoplasm c-Green plastid d-cell wall

5-Yeast fungus is used in making

a-bread **b-alcohol** c-oil d-sugar

6-The plasma membrane surround thedirectly

a-green plastids **b-cytoplasm** c-nucleus d-vacuole

7-Yeast fungus producedgas

a-oxygen b-nitrogen c-hydrogen **d-carbon dioxide**

8-Thecell is the building unit of animal body

a-plant cell **b-animal cell** c-animal tissue d-plant tissue

9-Roots are from the plant

a-systems b-cells c-tissues **d-organs**

10-The body consists of

a-organs **b-systems** c-tissues d-cells

11-the system consists of

a-organs b-cells c-tissues d-bodies

12-the smallest building unit of the plant's body is.....

a-animal cell **b-plant cell** c-tissues d- organs

13-The organ consists of

a-cells **b-tissues** c-systems d-body

14-.....can living organisms that can make their food by
photosynthesis process

a-Human b- Animals **c-Green plants** d-Fish

15-Plants make their food by.....process

a-digestion b-respiration **c- photosynthesis** d-circulation

16-one example of producers is

a-algae b-birds c-reptiles d-fungi

17-Plants usegas in the photosynthesis process.

a-nitrogen b-chlorine **c-carbon dioxide** d-hydrogen

18-Plants producegas during the photosynthesis process

a-oxygen b-chlorine c-hydrogen d-nitrogen

19-.....are living organisms depend on producers to get food

a-Producers **b-Consumers** c-Decomposers d-Algae

20-is an example of consumers that feed on producers

a- Cow b-Snake c-Tiger d-Lion

21-A human is

a-producer **b-consumer** c-decomposer d-algae

22-Bread mold fungus is a

a-producer b-consumer **c-decomposer** d-algae

23-The living organisms that get food from dead bodies are.....

a-consumers b- producer **c-decomposer** d-algae

24-One example of decomposers is

a-algae **b-fungi** c-birds d-cow

25-A hawk is an example of

a-producer b-decomposer **c-consumer** d-algae

26-The plant's cell can make photosynthesis by.....

a-cell wall b- vacuole **c- green plastid** d- plasma membrane

27-lion is an example of

a-producer b- decomposer **c-consumer** d-algae

28-Green plants are

a-producer b-decomposer c-consumer d-algae

29-The plant cell is surrounded by

a-Vacuole b-nucleus c-green plastid **d-cell wall**

30- Green plants are examples of

a-producer b-decomposer c-consumer d-algae
